Get more value out of your captive with Captive 360°

Maximum value is realized by strategically analyzing every aspect of a captive's operations and acting on the most important items. Captive 360° is different than typical captive strategic planning.

Holistic Review, Executable Plan, Results-Driven

Maximize captive value by delivering a comprehensive, robust, data-driven strategic plan.

Our proprietary methods, materials, and software deliver a plan that is focused and actionable.

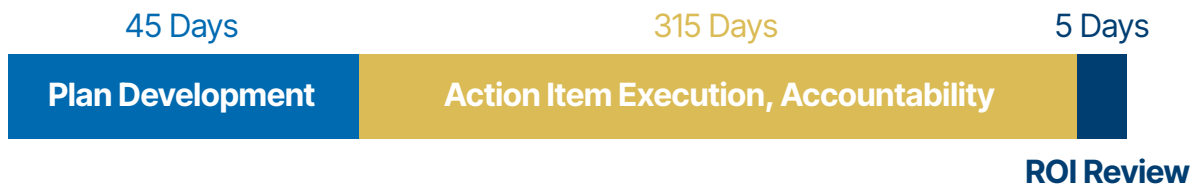

Participants enjoy the “gamified” brainstorming modeled off of a board game format.

Objectives are prioritized, a handful of initiatives are selected for implementation, and each project is assigned a champion and manager to ensure accountability and drive results.

We value your time. The four, half-day in-person sessions are designed for efficiency to make the most of participants’ engagement.

Captive 360° measures the value delivered by the focused action items, so you have a clear view of return on investment at the end of the engagement.
